Layers: Managing Your Image Data The most essential tool in Photoshop is the Layer panel. Layers are the structure you work with when creating, editing, and manipulating your photo. When you open an image, Photoshop creates a special invisible layer named `Layer 1`. After you add a layer and modify it, you save your file. If you've used a different layer (such as a Background layer in a typical layered file), and you save your file, the new file opens on a layer that's hidden. The layer that's hidden is `Layer 2`, and so on. Each time you open a file, Photoshop creates a new layer (`Layer 1`). Photoshop lets you work with layers using two ways:

The demand is immediate. In an age where we either agree to medical intervention with little choice or politely ignore the need altogether, when people have their choices diminished, the need to undergo medical interventions is greater. It will always have been the case that those who can afford it will get access to them, but now the means of accessing those interventions are also being limited. Silent Spring: If we're going to get better, we need to start with the premise that we should all be stronger, fitter, and healthier than our parents and grandparents. ~~~ So when you ask yourself, "what does this healthcare bill mean for my life?" remember that, 1. It puts the financial burden of more health insurance onto the backs of people who don't have the wealth to afford it. 2. It will end up costing more in the long-run. 3. It's just another in a long line of unnecessary bureaucratic costs that smother our small businesses, startups, and poorer communities. 4. It's a blatant power grab by insurance companies that will have disastrous long-term effects on many who want to pursue holistic health, as treatments move toward the medical model of medication-first. 5. It is still probably the most extreme version of the "pre-existing conditions" law that exists. You have always been able to keep your insurance after a policy lapse as a preventative measure, but now that is done away with. 6. Doctors will not be able to deny you treatment, but they will no longer be able to recoup their money for doing it. Since we are now considering the percentage of malpractice lawsuits that are never won, and the 10% of lawsuits where medical professionals did nothing wrong, the practice of medicine will have to become far more conservative, as it will be less profitable if you don't give someone medicine. So given all of that, where is the patient's best interest served by this bill? 7. Rich people in-network with a particular doctor are going to be able to get both better care (since they'll have more money to buy it) and better insurance (since their insurance companies will be able to better negotiate deals with doctors' offices), while everyone else has the crushing weight of healthcare expenses sitting on them. 8. It will most certainly make health insurance in
